## About

Dedicated student with a solid 9.0 GPA, proficient in coding, and able to work effectively either independently or within a team. Eager to learn new things, including creative work, which can be very helpful for an organization such as yours.

## Skills

### Web development(HTML, CSS, JS)

*My work has included creating a website for clinic management, a to-do list, an app for weather information, a timer, and many other small projects.*

### C/C++ Programming

*C and Python are the current programming languages I use for competitive programming.*

### Python

*My interests include artificial intelligence, machine learning, and internet of things. I have not yet completed a major project in these areas.*

### Canva

*Posters for university events are something I enjoy designing. I've designed some creative posters for my club using Canva pro.*
